

REMARKS

The advisory action of February 23 indicated claims 1 and 4 as being allowed. There is an obvious error in claim 4 which continued to refer to a magnetic filler notwithstanding the fact that its antecedent in claim 1 had been amended to  $\text{CrO}_2$ . This response corrects that error and cancels the rejected claims.

It is therefore submitted that the application is now in order for allowance and an early action this end is respectfully submitted.

Respectfully submitted,

John Richards
